

GSM Modem

Remote site management made easy ...

Simplify patrol data collection ...

The CheckPoint GSM Modem Unit uses mobile telephone technology in a stand-alone unit for easy data collection. Simply plug it in and you're ready to collect your data.

Manage remote sites with ease ...

The GSM Modem unit is ideal for managing remote sites and significantly reduces both the cost and hassle of collecting your patrol data from remote locations. Simply dial in and collect your data.

Portable Data Collection ...

With your GSM modem unit you can provide your mobile supervisor with a cost effective portable data collector. The GSM unit simply plugs in the vehicle's cigarette lighter and your data is ready to collect.

Expand your business catchment area ...

Now you can expand your business catchment area, confident that you can reliably manage remote sites and collect the data cost-effectively.

'Simply plug your GSM Modem unit in and you're ready to collect your data'
